2 Resuming the training after sagemaker crash

- Since sagemaker crashed multiple times, we had to resume the training multiple tines. We always resume from the last saved checkpoint
- Because we had to resume the training so many times, the patience got reset upon each resume. Because of that, the training kept going even tho the validation accuracy was not improving anymore (as seen in the graphs bellow), and that's why we stoped training after ~150 epochs. The training also took 14+ hours…

[2]:
```python
import torch
import gc
from ultralytics import YOLO

model = YOLO("/home/sagemaker-user/runs/yolov11m-transfer/weights/last.pt")
model.train(resume=True)
```

```
New https://pypi.org/project/ultralytics/8.4.53 available  Update with 'pip
install -U ultralytics'
